

Services and Capabilities

**DeGood Dimensional Concepts, Inc.** offers complete manufacturing services in order to minimize effort for the customer and maximize delivery expectations. We will work hand in hand with the development engineers, quality and purchasing to deliver products with the least amount of hassle and confusion.

**Products – DeGood Dimensional Concepts** is a complete manufacturing facility offering a full line of products in the orthopedic, spine, and trauma arenas.

Instrumentation

- Cutting Apparatus
- Tooling
- Drills
- Forceps
- Cutting Blocks
- Gages
- Reamers
- Holding Apparatus
- Arthroscopic and Endoscopic instruments
- Bone-Cutting Instruments
- Rasp

Implants

- Spinal hooks, Sleeves
- Bone Screws, Plates
- Screw Fasteners
- Joint Replacements - Hip, Knee, Ankle, Shoulder
- Maxillofacial
- Bone Plates
- Extremities
- ...And Much More

Our Mission Statement

Our mission at **DeGood Dimensional Concepts** is to supply the Medical Device Industry with the best package of services possible by developing, manufacturing and assembling first class products. It is our commitment to provide effective, creative solutions to our customers by utilizing unsurpassed standards resulting in on time deliveries with the highest degree of quality while maintaining cost effectiveness. We are building our history of success by working hard to enhance the value we provide to our partners in Orthopedic, Trauma and Spinal care. It is our responsibility to our customers as well as our employees to be distinguished in maintaining an environment of superb team work with an emphasis on continual improvement. We accomplish this through our focus on the future, striving to be recognized as a company of dedication, honesty, integrity and leadership in the medical field.

100% Dedication to Excellence in the manufacturing of Orthopedic Implants and Instrumentation.

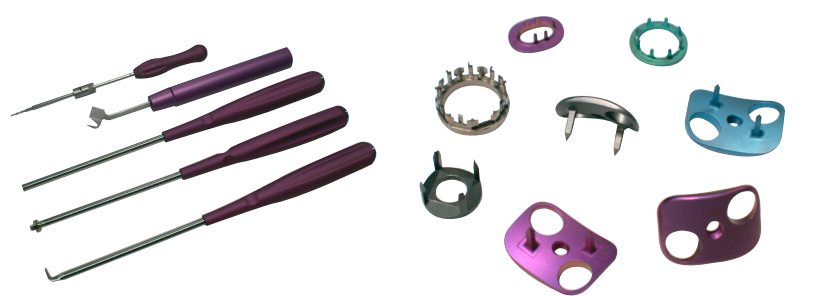

**DeGood**  
Dimensional Concepts, Inc.

**DeGood Dimensional Concepts, Inc.** is a custom manufacturer of precision orthopedic, spinal, and trauma implants and instruments. Whether it's co-developing parts for manufacturability or contract manufacturing to a customer's print, our goal is to meet or exceed our customer's expectations in providing quality products, on time every time. We accomplish this with systems controlled planning, trained personnel, state-of-the-art equipment, and continuous improvement processes. We are **ISO 13485** compliant and FDA CFR Part 820 compliant.

The company was founded in 1997. Certified as a Class 8a Woman owned business by NAGC (National Association of Government Contractors) an entity of the SBA. Member ID 1200050

We welcome any interest you may develop in our company and stand ready to prove ourselves by providing you with competitive estimates, fast turnaround, quality products, and customer satisfaction.

**DeGood Dimensional Concepts** is a company truly committed to the constant pursuit of process excellence!

**DeGood produces the highest quality products at extremely competitive costs by leveraging four primary advantages:**

- Utilizing the best CNC machine tool technology, specifically designed to machine precision parts
- Devoting essential quality control and engineering time to develop an accurate and repeatable manufacturing processes
- Employing the best and most experienced programmers, machinists and quality control personnel
- Specializing in Complex component assemblies for both Instrumentation & Implants

## Multi Axis Turning

With a great variety in Multi-axis Swiss with thread whirling capabilities and Traditional CNC turning centers, we can create cost-effective and close tolerance precision parts including:

- Plate Fixation Screws
- Multi-axial screws
- Locking devices & Spinal Rods

## Multi Axis Machining

With multiple high speed 3 and 4 Axis machining centers, we can manufacture all of the complex shapes and close tolerances required for internal and external fixation devices, including:

- Cervical Plates
- Small Bone Plates
- Fixation Devices
- Fixation Plates
- Hooks and other Spine products
- Trauma Plates, etc.

## Other Machining and Processes

We also offer full services in the following areas:

- CAD – CAM
- Wire EDM
- Ram EDM
- Surface and thread grinding
- Centerless grinding
- Gun drilling
- Tig welding
- Heat Treating
- Furnace brazing
- Coatings
- Assembly
- Labels & Packaging

*please see our website at [www.degooddc.com](http://www.degooddc.com) for a complete equipment listing*

## Quality Control

**DeGood's** quality control department is staffed with experienced medical device managers and quality control personnel. ISO certifications will insure quality parts are delivered with all required documentation.

Inspection equipment includes various types of measuring equipment including the following:

- Height stands and gages
- Surface plates
- Calipers and micrometers
- Thread rings, plugs, pins and block gages
- 12 to 30 inch comparators

## Finishing

**DeGood** metal finishing department can perform the following including, a variety of other services:

- Polishing and Buffering
- Ceramic Bead blasting
- Various media Tumbling
- Ultrasonic Cleaning
- Laser Marking
- Electropolish
- Passivation

## Materials

**DeGood** has experience with all materials including:

- Medical grade Titanium
- High strength Stainless Steel
- Medical Grade Stainless Steel
- Cobalt Chrome
- Medical Grade Plastics
- Exotic Alloys
- Cross-linked UHMWPE
